**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 12-23 and 53-54, drawn to a golf club/set, classified in class 473, subclass 297.
  - II. Claims 24-52, and 55-56, drawn to a method of making a golf club, classified in class 264, subclass 635.
  - III. Claim 11, drawn to a method of using a golf club, classified in class 473, subclass 409.
  
2. The inventions are distinct, each from the other because of the following reasons: Inventions of a golf club/set and a method of making a golf club are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another process as not mounting a plug to a mandrel but by inserting a plug into the interior of a shaft. In addition, the inventions a golf club/set and a method of using a golf club are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the

Art Unit: 3711

process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using a product can be practiced with another materially different product as a club without plug made of carbon fiber reinforced polycarbonate but a plug made of only metal. Finally, inventions of a method of making a club and a method of using a club are related as process of making and process of using the product. The use as claimed can be practiced with a product made by a materially different process as not applying a plug to a mandrel but inserting a plug directly internal to a shaft.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Joseph C. Andras on 17 March 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
